

curite

the revolutionary glazing system

available in a choice of colours

revolutionary new clip design
means identical front and back

no spraying required

grain that looks like wood

The waiting is over. At last, a cassette that improves the standard and quality to your door and speeds up production. Compatible with other internationally available Glazing systems, this revolutionary new cassette has been designed to easily replace existing methods.

The Curite cassette comes ready with PE foam weather seal (double sided tape) and all you need to do is position the connector in place and push together (for additional security, inject with a liquid nail product prior to inserting the connectors).

This eliminates the need for screws and screw covers and provides the most reliable of weather seals.

Supplied in (UV stable) through colour and grained to look like timber, it will not require painting. No need for spraying means you can forget chipping, scratching or peeling. You will not need to replace another cassette again. It also means a huge saving in spraying equipment and labour and will also eliminate health and safety hazards.

If we do not have your colour, let us know.

With a choice of sixteen designs in various colours, Curite has a cassette for every door design.

**Please also enquire for
68 mm door slabs cassettes**
